Muzzle loader and heavy revolver A-Frame® bullets are one in the same. Both initiate expansion at 950 feet per second, expand to .65x their original caliber, and maintain 97% of their weight. They are virtually indestructible at velocities in excess of 3000 feet per second.

Remington

Premier® AccuTip® Muzzleloading Bullets

The Remington Premier AccuTip muzzleloading bullet has exceptional mixture of angle accuracy and devastating terminal performance inside 300 yards. The 100% copper bullet has a polymer tip that initiates rapid expansion and maintains 100% weight retention. The bullet is locked to a revolutionary new sabot engineered to withstand the rotational force of a 200 grain powder charge leaving the muzzle at 2400 fps.

NOSLER®

Ballistic Tip® Muzzleloader

The Ballistic Tip® MZ was created to bring legendary Nosler® Ballistic Tip® rifle bullet accuracy and terminal performance to today's generation of high performance muzzle loading rifles.
This new bullet is designed with an orange polymer tip and streamlined ogive to maximize effective shooting range. The polymer tip also assists in initiating bullet expansion upon target impact which is a signature of the Ballistic Tip® line. Created specifically for the lower velocities generated by muzzle loading rifles, the Ballistic Tip® MZ provides reliable expansion and deep penetration over a broad range of velocities.

- *Stream Lined Ogive To Maximize Effective Shooting Ranges*
- *Polymer Tip Assists Bullet Expansion*
- *Pre Packaged in 15 Count Blister Packs*
- *.50 Caliber 300gr Ballistic Tip With Sabots*
- *Team Shockey Tested for Over a Year*

Round Balls

For those hunters who prefer (or are required by law) to use patched roundballs in their muzzleloader, T/C offers these precision swaged, pure lead roundballs. Sized properly to work with any T/C rifle o pistol of appropriate caliber. Used in conjunction with T/C patches lubricated with Natural Lube 1000 Plus™ Bore Butter these round balls will give superior accuracy.

Maxi-Ball® Bullet
Superior Penetration

T/C's Original Maxi-Ball® has been used extensively by target shooters and hunters for almost 20 years. Its reputation as an exceptionally accurate bullet (which is easily loaded in the field) is unequaled. The wide lubricating grooves allow generous amounts of lube, the key to easy and consistent loading. T/C Maxi-Balls® are available in .45, .50, .54 and .58 caliber prelubed. Prelubed Maxi-Balls® are lubricated with Natural Lube 1000 Plus Bore Butter eliminating the need to wipe the bore or clean between repeated shots. T/C's Maxi-Ball® is the preferred bullet of experienced hunters who look for the penetration needed for large game like Elk, Moose, or Bear.

Shock Wave™ Super Glide Sabots

A revolution in sabot design. The first sabot that can be loaded easily with one hand. Space age synthetic material is used to create this easy loading sabot. The two petal design supports the bullet for optimal rotational stability and breaks away when exiting the muzzle for match grade accuracy. Four petal sabots can not match the accuracy. These sabots are designed to withstand the high pressures of magnum loads. Available with Shock Wave™ and Bonded Shock Wave™ bullets.

Cheap Shot™ Sabots with Mag Express Sabots

T/C Cheap Shot™ Sabots offer the hunter a more economical alternative to the jacketed bullets that are available. The all-lead 240 grain hollow point bullet provides the shooter with the same basic ballistics and trajectory. A muzzleloader sighted in with 240 grain jacketed bullets will be "right on" with T/C's Cheap Shot™ Sabots. Point of impact will be the same. These sabots are ideal for the hunter who does a lot of pre-season practice, or the hunter who prefers an all lead projectile (or is required by law to use one). The deep hollow point cavity provides maximum expansion and down range energy... at only a fraction of the cost.

Mag Express™ Sabot XTP™ Bullet

T/C's Mag Express™ Sabots are designed to be used with jacketed or lead pistol bullets. Mag Express™ Sabots load easily, and are designed to separate from the projectile quickly. This rapid separation means superior accuracy, as the projectile is influenced less by the "drag" of the sabot, while on its way to the target. T/C's Mag Express™ Sabots are available prepackaged with XTP™ bullets, known for their tremendous expansion, or as loose sabots, ready for custom loading. They offer superior performance with conventional charges, or magnum charges of up to 150 grains of black powder or Pyrodex® equivalent (or 3 Pyrodex® Pellets). When using T/C's Mag Express™ Sabots behind magnum charges, the hunter can extend his range out to 200 yards.

Shock Wave™ Sabot Bullet

The Shock Wave™ is a new spire point bullet with polymer tip specifically designed as a muzzleloading sabot bullet, not a conventional pistol bullet converted to a muzzleloading projectile. Modern technology previously only applied to centerfire rifle bullets. As advanced as today's muzzleloaders and their propellants. The polymer tip does double duty; it increases the Ballistic Coefficient for sustained high velocity down range, and it punches into the pocket to open up the nose cone for fast expansion. The result; 3" less drop at 200 yards, and devastating energy at velocities between 1,000 ft/sec & 2,200 ft/sec. Harder lead core with walls interlocked with the jacket for maximum weight retention and expansion. Tapered jacket for controlled expansion. Thicker copper jacket at the base to withstand magnum pressures without deforming the bullet

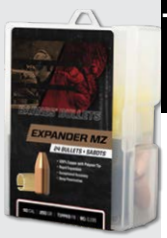
Shock Wave™ Bonded Sabots



A muzzleloading spire point projectile that will penetrate tough hide and bone with no separation of core and jacket. The bonded Shock Wave™ Sabots will deliver deep penetration and a destructive wound channel, no matter what the range, and with expansion that is over twice the original diameter. The bonded core and thicker jacket means this bullet will stay together when driven through the shoulders of deer, and even heavier game like elk, moose or bear.

Bore Driver® FTX® & ELD-X®

- Without a sabot, the Bore Driver™ FTX® seats quickly and easily for shot after shot performance.
- The FTX® & ELD-X® bullets incorporates an InterLock® ring that helps retain bullet weight upon impact that when coupled with a tough copper alloy jacket delivers deep penetration and expansion for the ultimate in on-game lethality.
- Polymer Tip: Upon impact, the polymer tip drives into the lead core like a wedge, initiating lightning-fast, yet controlled expansion.
- The polymer base features a post that fits into the bottom of the bullet. This post swells in diameter at ignition for better torque engagement from inside the bullet and the centering petals grip the bullet's boattail while the skirt engages the rifling to maximize energy transmission.

110V Electric Fillet Knife
The Old Timer® 110V ELECTRIC FILLET KNIFE comes with an 8 foot cord for better accessibility whether you are filleting at the dock or by the shed. Much like most of you, we were tired of other knives not having enough cutting power or breaking due to poor construction and materials. Our Electric Fillet Knives are designed and built to take out all the frustrations every fisherman has dealt with for far too long. Our "Built for Generations™" mission didn't stop at folding and fixed blades; it stretches across all knife categories. The electric fillet knife comes with a carrying case for easy on-the-go storage and a new 8 inch stainless steel optimal blade. This blade allows for easier cutting so you can spend more time fishing and less time filleting.
- *8" STS Blade • OA Length: 16.25" • Handle Length 8.25"*

ZT ZERO TOLERANCE KNIVES

Tim Galyean 0223

Inspired by the heritage of classic military knives, the 0223 is designed by Tim Galyean and precision built by ZT. This version is a folder, making it easy to EDC so its at hand for every task you take on. The clip-point blade has heavy jimping on the spine and a cutout to decrease weight. A series of decorative holes drilled in the ricasso echo the jimping and add subtle details to this handsome knife.

• Clip Point • OAL: 8.6 in. • Blade Length: 3.5 in.
• Closed Length: 5 in. • Blade Steel: CPM S30V
• Finish: DLC Coating • Array: Titanium/G-10 Overlay

0223 ..... C23KW0223 ..... $320.00

Jen Anso 0230

Minimalist design meet maximum performance in the new 0230 from ZT and Danish designer Jens Ansø. This slip-joint knife features a double detent system: two steel detent balls, one on each side of the blade. The hold the blade safely closed for carrying. Then, for controlled open and close, the 0230 also has a half-open position. Everything combines to make this a simple, yet extraordinary pocketknife.

• Sheepsfoot • OAL: 6.2 in. • Blade Length: 2.6 in.
• Blade Steel: CPM 20CV • Finish: Stonewashed
• Array: Carbon Fiber

0230 ..... C23KW0230 ..... $204.00

Jen Anso 0235

Zero Tolerance teamed up again with Danish designer Jens Anso and made the 0235, the second ZT slip joint. It has an ultra-premium CPM-20CV spear point blade with a nail-nick opener. Includes a reversible extra-deep-carry pocket clip.

• Plain Edge • OAL: 6.3 in. • Blade Length: 2.6 in.
• Closed Length: 3.8 in. • Blade Steel: CPM 20CV
• Finish: Stonewashed • Array: Carbon Fiber

0308- Coyote Tan

For those who prefer their knives on the larger side, we created the new 0308. The 0308 offers a beefy 3.75-inch blade of premium CPM 20CV. The handle features coyote tan G10 on the front scale with a titanium back. Both front and back are heavily 3D machined for an ultra-secure grip. The .25-inch solid pivot features a custom nut that enables it to be adjusted in the field with a .5-inch wrench. The pocket clip hole pattern is compatible with many after-market clips.

• Plain Edge • OAL: 8.9 in. • Blade Length: 3.75 in.
• Closed Length: 5.2 in. • Blade Steel: CPM 20CV
• Finish: Stonewashed • Array: G10 Front / Titanium Back

0707

Finding the perfect balance between big and small, the ZT 0707 offers something for everyone with its premium looks and cutting performance. Its sleek profile is comfortable in the hand, while also keeping a low profile in the pocket. Yet its 3.5-inch blade offers a substantial edge for most cutting tasks. Plus, for a first in the Zero Tolerance lineup, users can access the blade with ZT's Tuned Detent System (TDS™), which allows the knife to be opened even with pressure on the lockbar. A reversible extra-deep-carry pocket clip, carbon fiber handle scales, and CPM 20CV blade steel round out this feature-packed ZT innovation.

• Drop Point • OAL: 8.25 in. • Blade Length: 3.5 in.
• Closed Length: 4.6 in. • Blade Steel: CPM 20CV

Flitch

The eye-catching blade is made of 8Cr13MoV stainless steel, which can take and hold a sharp edge, yet resharpens easily. Then Kershaw's heat treatment brings out the best in this top-value steel. The blade is stonewashed to help hide hard use scratches. The result is a very distinctive looking blade that performs well, too. The handle is glass-filled nylon, textured and chamfered for a solid, comfortable grip. Pair that with the deep finger grooves on the underside of the handle and the Flitch offers an exceptionally secure grip. A sturdy liner lock keeps the blade in place during use, then releases easily when you're ready to EDC it.

• SpeedSafe® assisted opening • Liner lock • Flipper
• Reversible deep-carry pocketclip (left/right, tip-up)

Barstow

The straight spear-point blade, sharpened on a single side, is made of 8Cr13MoV stainless steel with Kershaw's BlackWash coating for a non-reflective, "already-broken-in" look. The coating not only helps protect the blade, but also hides use scratches. The handle has glass-filled nylon scales with heavy arrow-patterned texturing to enhance grip. A stout steel liner, also with non-reflective BlackWash, provides an equally stout liner lock to secure the blade open during use.

• SpeedSafe® assisted opening • Liner lock • Flipper
• Reversible deep-carry pocketclip (left/right, tip-up)

Volt SS

This newest version of the Volt offers a clean, sleek look and a classic clip-point blade. The Volt SS blade shape is a versatile clip point. With its narrow, clipped tip, it provides extra cutting control for delicate tasks. At the same time, the blade has enough belly to make it a good slicer, too. The handle is pure stainless steel with a sturdy frame lock. The Volt SS is equipped with SpeedSafe® assisted opening. Just pull back on the ambidextrous flipper and the blade moves out of the handle, quickly and easily.

- *Frame lock • Flipper Opening • SpeedSafe Assisted Opening*

HAVALON®

#115XT Hunter's Blade

The #115XT Hunter's Blade is one of our thickest micro-honed stainless steel blades. It's surgically sharp and made for precision cutting with an edge that lasts.
As an all-purpose big game hunting blade, the #115XT is the perfect option for any season.
• Stainless steel • 4 3/8" length • Fits all Baracuta-style knives
#115XT Hunter's Blade *(5-Pack)*
C23GZHSC115XT5 ..... $17.99

#127XT Fillet Blade

Made from micro-honed stainless steel, the #127XT fillet blade is thick yet flexible enough to cut the perfect fillet. It has an edge that will last through multiple uses, and for filleting fish and deboning wild game, no other blade comes close to the #127XT.
• Stainless steel • 5" length • Fits all Baracuta-style knives
#127XT Fillet Blade *(5-Pack)*
C23GZHSC127XT5 ..... $17.99

#22XT Carbon Steel Blades

Put an end to holes in your hide with the #22XT blade. The blunt tip helps prevent accidental punctures in your work, and at 50% thicker than our normal #22 blade, the #22XT holds a longer edge and is able to resist heavy breakage.
• Carbon steel • 2-1/8" length • Individually foil wrapped
• Fits all Piranta-style knives except the Tracer-22
#22XT Carbon Blade *(12-Pack)*
C23GZSCC23XTDZ $8.09

#60A Stainless Steel Blades

At 20% thicker and 30% stronger than our #60XT blade, we've improved our cutting edge sharpness with the #60A blade. Whether you're skinning, quartering or field dressing, the #60A is able to withstand heavy use and resist breakage, and is the ideal choice for any serious hunter looking for both strength and precision.
• Stainless steel • 2-3/4" length • Individually foil wrapped
• Fits all Piranta-style knives
#60A Stainless Blade *(12-Pack)*
C23GZSSC60ADZ $9.89

#60XT Stainless Steel Blades

With our #60XT blade, we've taken surgical precision to a whole new level. The #60XT is incredibly sharp and has an edge that's able to endure countless skinning and field dressing of any kind of wild game.
Due to its unmatched superiority, it's easy to see why the #60XT is one of our most popular blades.
• Stainless steel • 2-3/4" length • Individually foil wrapped
• Fits all Piranta-style knives
#60XT Stainless Blade (12-Pack)
C23GZSSC60XTDZ $8.99

#70A Stainless Steel Blades

Our new blunt tip #70A blade prevents any accidental damage that may occur while skinning and caping. It's just as thick as our #60A blade, the only difference being the blunt tip at the end. Avoid unintentional punctures to your hide using the same surgical precision that only a Havalon can deliver.
• Stainless steel • 2-3/4" length • Individually foil wrapped
• Fits all Piranta-style knives
#70A Stainless Blade *(12-Pack)*

DRURY OUTDOORS

Rack Jack Rattle Device

The DOD Rack Jack rattle device is a 2-part rattle device designed for and approved by the Drury Outdoors Team. This 2-part design is unique that is inclusive within in itself. The ram in contained inside the barrel. Produced with opposing polymers the contrast in materials replicate the different sounds of 2 rival bucks. Operated aggressively results in those initial battle engagements, then operated slowly replicates realistic sparring sounds. The open-ended barrel allows the directional ability to cast the sound in different directions. With the Rack Jack's unique design and low profile you can quickly and quietly stow it away. Contained within itself with a snap lock renders the Rack Jack silent for quiet carry.

Scoot-N-Shoot MAX

The previous version included a removable, artificial fan with hub that gave the option of using a real fan as well. The MAX not only has this same great feature but we've added wing hubs and removable wings, which allow for the use of real wings. This makes the MAX about as realistic as a gobbler himself. We've also included see-through, mesh windows in the fan to increase field visibility, while keeping the hunter concealed. Very few gobblers will allow him to invade their space without a fight.

Scoot-N-Shoot MAX ..... C23JUHW2513 ..... $66.99

Scoot-N-Shoot Gunner

MOJO created a revolution in turkey decoys with the introduction of the Scoot & Shoot Decoy, which is a specialized Strutter Tom specially designed to facilitate the age-old method of turkey hunting usually referred to as "fanning". It is an aggressive style of hunting gobblers in the spring seasons by simulating a strange gobbler attempting to intrude on other gobblers' territory, gobblers usually with hens.

It is thought by many to be the most exciting way to hunt turkeys.

Scoot-N-Shoot Gunner ..... C23JUHW2524 ..... $58.49

Car Chargers

Heavy-duty DC charger utilizing cigarette lighter for power. Made for charging rechargeable AA batteries (never try to charge non-rechargeable batteries) in the MOJO DOUBLE TROUBLE CALLING SYSTEM and other devices that have a 3.5mm charging port and use 12-volt rechargeable batteries.

12V Car Charger ..... C23JUHW2407 ..... $16.49

WAYNE Carlton's Calls®

Boss Cow Call

The Boss Cow Call is an open-reed elk call that makes loud, mature cow moos and bleats. It drives bulls crazy with its high-pitched estrus vocals, while also making the realistic low-end nasal sounds of an old boss cow. It features a new adjustable notched frame for setting the desired sound without accidental movement. Adorned with a custom walnut-and-maple wood barrel with a textured elk antler design, it looks as good as it sounds. Includes lanyard

Boss Cow ..... C23HU70166 ..... $11.49

Mac Daddy

Includes mouthpiece with removable baffle, small removable grunt tube and lanyard with four loops. Mouthpiece features Infinity Latex®. The easiest call to use, it makes the most authentic bugles and nasal cow calls. Anyone can use— from beginners to seasoned elk hunters. Baffle tones down volume for close-in calling. With Advantage Max-1 HD® camo cover and instructional DVD. Patented.

Mac Daddy
C23HU70175 ..... $34.49

Squirrel Call

Squirrel calling has never been easier. This game call imitates both fox and gray squirrels, and makes baby-squirrel distress calls. Effective and easy to use, it produces realistic squirrel Barks, Chatter, Alarm Calls and Young Squirrel Distress Calls and works in any weather.

Squirrel Call
C23HU08200 ..... $7.79

Super Blue Double Reed Elk Diaphragm Call

It produces a complete range of elk sounds, from cow calls to mid- to long-range bugles, without ever intimidating smaller bulls. Reliable, realistic, and hands free, it features durable Infinity Latex®, which absorbs significantly less moisture for long-lasting performance.

Super Blue Double Reed Elk Call
C23HU70001 ..... $4.29

Herd Bull Triple Reed Elk Diaphragm Call

The Herd Bull Triple Reed is one of the strongest, loudest, most durable elk diaphragms ever built. It produces deep, nasally cow calls and loud, deep-tone elk bugles. Blow as hard as you want and it will keep on blowing. Its three thin reeds withstand the stress of mixing it up with the most aggressive bulls.

Herd Bull Triple Reed Elk Call
C23HU70002 ..... $4.29

Fight'N Cow Call

The granddaddy of exposed-reed elk calls, the Fight'n Cow Call is a small-reed call that creates the high-pitched sounds of a cow elk fight. It's small enough to fit easily in your pocket, yet cranks up the bulls and brings them in.

Fight'N Cow Call
C23HU70037 ..... $6.79

Lonesome Cow Call

For increased volume and a higher pitch, our Lonesome Cow Call features a specially designed large call body. This allows your calls to carry farther and commands the attention of any big bulls in the area It's simple to use—just bite, blow, and reap the rewards

Lonesome Cow Call
C23HU70040 ..... $7.49

Long Ranger & Fight'N Cow Combo

This combo includes two of our most popular open-reed calls the Long Ranger and the Fight'n Cow Call. The Long Ranger is an aggressive high-pitched locator call that simulates the sounds of cow elk across great distances. The versatile Fight'n Cow has a range of options, from the high-pitch sounds of a cow elk fight to the soft, subtle sounds of a cow in heat. Each call has adjustable bands on the reed, allowing you to easily adjust the tone

Long Ranger & Fight'N Cow Combo

RNT RICH-N-TONE CALLS

Quack Head Original Duck Call

This is the ultimate one call that will do it all. From loud ringing hail calls, raw, hang-it-all-out duck, to super sexy, soft, up close, "put your landing gear down" calling. This call was designed to be easy for the average caller to operate. Made to produce a wide range of sounds both soft, low, loud, and raspy. And built to last and withstand the harshest, coldest, wettest, nastiest weather brought on by the almighty duck gods. Simple. Versatile. Dependable. FOREVER. This is the way it is and will always be.

Quack Head Original Duck Call.....C23VVRNT91137.....$49.99

Quack Head Mondo 2B

Cut-Down Style Duck Call

The Mondo 2B is a Cut-Down style call designed in the J. Stephens Call Shop. John has always liked the qualities of a "Cut-Down" style call but at first, struggled to operate this style of call. Most cut-downs took a lot of air to operate and didn't have enough built-in backpressure for his style of calling, so he set out to make a call that had more backpressure and hold. John has always preferred his hunting calls to have a deeper and raspier tone than most typical calls, providing the ability to get soft on the low end, still able to bark and push the call on the top when needed.

Quack Head Mondo 2B .....C23VVRNT91126.....$49.99

Daisy Cutter Series Duck Call

Single Stack Duck Calls

No contest ring. No gimmicks. No compromising. It's just pure, raw, balls-to-the-wall, don't tell your mother, most powerful, non-nuclear duck calling machine on the planet. Modeled after the super nasty Short Barrel, we have added a much more aggressive calling style to its design. It's a Short Barrel on steroids. We have given the call a higher reed set along with a wider bore to give it a more demanding presence than the Short Barrel, while still maintaining the ability to get down and dirty on the low end.

Carbon Express Maxima Triad XSD Hunting Arrows

The Carbon Express® Maxima™ Triad™ is a Tri-Spine XSD (Extreme Small Diameter) .166 hunting arrow with performance at its core. Featuring Carbon Expresses exclusive REDZONE™ Technology, the Patented three spine arrow shaft creates less than 1/3 the oscillation of single spine arrows and FOUR TIMES THE ACCURACY for easier tuning and unprecedented accuracy. Constructed of ultra-stiff and strong 30-ton carbon, the Triad recovers faster from the bow to reduce oscillation and increase accuracy with shot-after-shot repeatability.

The Sport Hunter Xtreme was engineered to help provide superior stabilization while conquering shot-induced vibration, resulting in the ultimate hunting stabilizer. The Sims Internal Harmonic Dampener and De-Resonator combine to effectively minimize vibration transferred from the riser to the stabilizer upon release of the arrow. The individual 1 oz. end-weights allow users to customize their stabilizer to meet the ideal balance requirements of their particular hunting bow. Together, it equals added confidence to make YOUR shot of a lifetime.

55 Gallon Barrel Feeder ..... C23VBCAPBAR $400.49

400 lb Gamekeeper Capsule Feeder w/ Legs

The Capsule Feeder is the problem-solving alternative to traditional gravity feeders, tripod feeders, and other game feeder kits. The rugged capsule construction rests on the ground and is durable enough to withstand all the forces of nature. With the Capsule Feeder, there is no more worrying about animals knocking over your tripod feeders, or stealing from your gravity deer feeders. The durable feeder cage protects the feeder kit from varmints, such as raccoons, while allowing an effective distribution of your game feed.

- *The Capsule feeder rests firmly on the ground. It's safe and easy to operate*
- *The Capsule feeder is virtually indestructible. It saves you time, and time is money*
- *No feed is lost to thieving animals. Capsule Feeders keep feed in and animals out*

Jurassic Rock®
Year-Round Mineral Supplement

Deep beneath the ground, in Redmond, Utah, lies a salt deposit that has remained untouched for millions of years. During the Jurassic period, an ancient inland sea known as the Sundance Sea covered much of the Western United States. Over the course of millions of years, the sea eventually dried up and formed a large mineral deposit. This deposit is where we mine Jurassic Rock, a mineral rock that is packed with all of the minerals that deer love.

Viper® SD

DEADMETAL QUICKDRAW RAPIDCLIMB SUMMITLOKT

The Viper® SD is light - only 20 lbs. with a seat and cables. It is also portable, the frame nests together and packs on your back. The solid front bar makes it easy to use - no supporting your weight on your arms. Just sit on the bar and let your legs do the work. The frame design works just as well for bowhunting as with a rifle. It can do it all - and it is no wonder why the Viper® SD is so popular.

The Ameristep Throwdown Turkey Blind does just what you'd expect: gets you ready for gobblers and predators to roll in within seconds. The patented hub design with integrated stake system holds the Throwdown to just one piece of gear to keep track of, and it easily stows in your turkey vest for quick access. For such a compact blind, the Throwdown has impressive concealment power - able to cover two hunters with extra camouflage from realistic 3D leafy die-cuts. Creates a compact footprint with a solid hold that won't fall down when the moment of truth arrives

The CLAW® Game Hauler

The CLAW Game Hauler offers bird, turkey and small game hunters a non-slip, non-absorbent hunting strap to carry their bounty comfortably in the field. Freeing up a hunter's hands allows for more important matters...like hunting more birds and game. Plus, this reduces the potential for birds and game to spoil which can happen when using a pouch vest or bag. The CLAW Game Hauler provides a safe, secure and highly functional alternative for bird and small game handling in the field.

Double Bull® Tri Stool

When you spend as much time in our ground blinds as we do, you eventually create the "best seat in the house" instead of trying to "make do" with some chair from a discount store. Standard chairs are apt to cut off blood flow on the back of your legs, leading to discomfort and cold feet. They also restrict mobility and don't allow the range of motion that our QS3 Tri-Stool provides. s.

Shooters Rump Rest

Sitting still so the turkeys won't see you is no longer a challenge. Due to its special contour, The Shooters Rump Rester™ Turkey Hunting Seat provides a comfortable shooting position and can be used in either direction, depending on the slope of the ground. The seat keeps you above the rocks and tree roots and the legs are twice as wide as those on typical seats to keep you from sinking into the forest floor on wet morning hunts. Four 12 ga. shotshell holders are molded in to prevent fumbling with ammo, when you need it most. Fishermen will also enjoy this seat not only for its comfort, but because it has a place to prop their rods.

Rapid Rack™

Hornady® Manufacturing is pleased to announce the Rapid Rack™ empty chamber indicator and load assist device. This innovative product allows those on patrol or in their home to keep their long gun ready with a fully charged magazine and an empty chamber. Available in three sizes: AR-15, AR-10 and select 12 gauge shotguns, its red lever/handle visually displays an empty chamber, but is made ready in seconds. When ready, shoulder the gun and pull the Rapid Rack™ lever straight back, simultaneously allowing it to fall to the ground while the firearm's fully charged bolt springs forward to feed a round into the chamber.

Rifle Ammo Boxes

Bullets are placed in the box in the down position and are protected by four special fingers. These fingers are designed to keep most bullet tips from hitting the bottom of the box, preventing tip damage that can change bullet flight characteristics. There is also extra space provided between rounds to facilitate easy removal. The convenient fold down carrying handle is specifically designed so that belted magnum rounds can be carried rim up or down.

Sportsman's Utility Case .....C23MTSU411 .. $42.49

802 Pocket Pistol Cases

Shaped like a traditional gun rug. Perfectly suited for compact size semi autos. Ideal for revolvers with barrels lengths less than 2". This little hard case is small enough to fit in places like night stands, glove boxes, gun safes, etc.

Pocket Pistol Case for 2" Barrel Revolvers and Auto Handgun *(Black)* .....C23MT802C40 ..... $6.49

803 Pocket Pistol Case

Slightly larger than the 802C. The 803 accommodates all pocket sized handguns with barrel lengths of less than 3". Because of its offset handle design, the 803 also keeps a small profile, yet leaves just enough room inside for a spare magazine with most pistols. A standard Colt 45 Cal., 1911 A1 fits perfect in this case. All subcompacts & most full size semi-auto's revolvers 3" or less.
Dimensions: Inside: 9.0" x 5.8" x 2.9"
Outside: 9.6" x 6.5" x 2.1".

These wallets are made of Top Grain Vegetable Tanned Cowhide and are meticulously designed to be free of any points of deterioration or wear (like plastic windows or dainty designer wallet pockets). The entire outside panel of the wallet is lined with an anti-RFID material to keep information thieving RFID scanners out. Finally, the solid Brass and solid Steel medallions add that touch of Smith and Wesson class that reaches above and beyond just quality and workmanship. These wallets are hand made by craftsmen in India utilizing enturies-old traditions of quality and workmanship.

ATB

- Fits inside range bag and backpacks. You can now carry a days worth of ammo (400-600 rounds ammo) INSIDE your bag. Meaning you only need to carry ONE bag to the range. No more loose boxes of ammo. No more ammo cans back and forth to the range.
- Nothing sharp on the whole bag means it won't risk tearing up leather seats or be hard on your vehicle in any way.
- Overbuilt to handle and seams for years of use and abuse.
- Integrated handgun magazine storage in the lid of the bag allows you to transport up to 5 full loaded, full size mags with mag extensions on top of the ammo you transport.
- Slick sides so you can easily remove this from a bag without snagging other gear.
- Hook/Loop material on the handle for name tapes or caliber tapes make identification easy.
- Caliber-specific patches available as well for rapid contents identification.
- Easily fit 2 of these into a backpack for an easy trip to the range. • Lifetime Warranty

Save-It™ Shell Catcher

Prevent flying shells from distracting you or others. The all steel Save-It Shell Catcher captures the empty hull when ejected through the receiver and holds the empty for easy removal. For use with all 12-gauge semi-auto shotguns. Soft, padded tape acts like a barrier; keeping the metal plate away from the gun. Wire catcher locks in up position for singles, turns down for doubles or pulls out for hunting. Easy to use and works great! *Wire can be bent closed while wire is not in locked position to fit 20-gauge semi-auto shotguns. *Fits most shotguns.

Icon X Short Sleeve

The Huk ICON X Short Sleeve is the most technically advanced performance fishing shirt, designed for hardcore anglers. Comprised of Double Pony Polyester, this synthetic material spreads moisture over a larger surface area creating a rapid drying effect that cools the body after coming into contact with perspiration. The synthetic fibers allow air to pass through the shirt and contain a hydrophobic coating that transports sweat to drier areas, away from the skin.

Sargasso Sea	C23ATH1200267409	$35.00

Strike Solid Long Sleeve

The Huk Strike Long Sleeve is the most technically advanced performance fishing shirt, designed for hardcore anglers. The strike features Huk Stain Release technology to easily wash stains like fish blood.
The synthetic mesh material on the sides and under arms, spread moisture over a larger surface area creating a rapid drying effect that cools the body after coming into contact with perspiration. These synthetic fibers allow air to pass through the shirt and contain a hydrophobic coating that transports sweat to drier areas, away from the skin.
